Enrollment No : 22002170510009

Batch : A5

Branch : AIDS

Introduction

In today's fast-paced world, teams need a simple way to work together, "Collaborative Workspace" is easy going tool that can make your stuffs easy and assembled. it brings people, tasks, and ideas into one place.

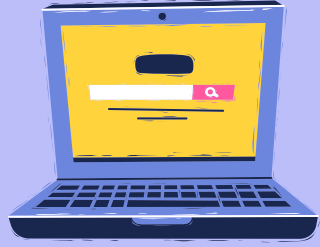

Idea that lead to this concept

- The idea came from the need for teams to work together smoothly, especially when working remotely.
- Managing people, tasks, and files can be tough without the right tools.
- This platform offers a simple solution where teams can stay connected, organized, and get work done.

Functionalities

1. Team Management:

- Create teams, add members, and assign roles.
- See team members' profiles and roles.

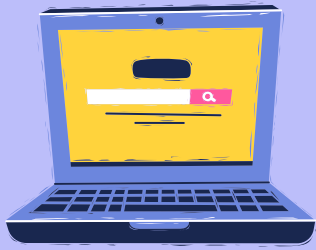

2. Task Management:

- Assign tasks to team members, set deadlines, and track progress.
- Organize tasks by priority and workflow.

3. File Uploading:

- Easily upload and share files.
- Let team members access shared files with version history.

Merits

- Increased Efficiency:
- Transparency:
- Remote Work Friendly:
- Perfect for teams working from different locations.
- Easy to Use
- Simple and intuitive design for all users.

Demerits

- Learning Curve
- Requires Internet
- May Not Scale Well
- Might slow down with too many users or large files.

Future Scope

1. Smart Task Assignment :

- Using AI to automatically assign tasks based on team members' strengths.

2. Real-Time Collaboration :

- Allowing team members to edit documents together at the same time.

3. Performance Tracking :

- Adding features to monitor team performance and task progress.

4. Integration with Other Tools :

- Connecting the platform with tools like Slack, Google Drive, or GitHub.

Collaborative Workspace

Thanking You!
